## Content Manager System Administration 8.4

<b>COURSE CODE</b>	IM520PH
<b>PRODUCT</b>	DB2
<b>RELEASE</b>	8.4
<b>DELIVERY METHOD</b>	Instructor led
<b>DURATION</b>	4 days
<b>FEE</b>	Php 148,920.00 plus VAT

### SUMMARY DESCRIPTION

This course is for those whose job includes responsibility for maintaining, monitoring, and configuring an operational Content Manager system. Maintenance tasks include administering users and groups, and maintaining all components of the various business processes or applications that run on the system. Monitoring tasks include ensuring that proper database sizing and backup parameters are met.

Work with a fully functioning IBM Content Manager system to practice the skills required to administer, maintain, and troubleshoot an IBM Content Manager system.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.

### TOPICS

- How to create or modify attributes, item types, and folders
- How to test changes to the system using the Client for Windows and WEBi
- How to create or modify users, user groups, privilege sets, and access control lists
- How to create or modify processes and process components
- How to configure system managed storage objects
- How to use various database and resource manager utilities
- How to manage log files and system backups
